

Set Branding

The Admin Panel allows you to personalize the name, primary color and logo being displayed in the **Webmail**.

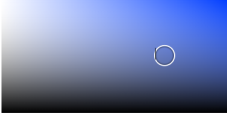

Need specific branding for different clients? You can override these global settings at the domain level. If you want a specific domain to have its own unique logo and colors, just head over to **Admin Panel > Domains > Branding**.

To update the branding for your account

1. Go to the [Admin Panel](#)
2. Log in using your Admin username and password.
3. Click on **Branding** in the menu bar
4. Update the fields
 - **Company Name:** Enter your company name - it will be displayed as the Webmail page title in the browser
 - **Company Web Link:** Enter the link to your website
 - **Support e-mail:** Enter the e-mail address used as the sender for **Spam Reports**
 - **Company Color:** Change the primary color for the Webmail to customize the look and match your own branding guidelines
 - **Upload Your Logo:** Click the upload button to select a logo file directly from your computer.
Note on Size: While there is no longer a strict size limitation for uploads, your logo will be displayed within a **210px x 35px** section in the **Webmail**. For the best visual results, we recommend using an image that respects these ratios.
5. Click on the **Update Settings** button to save the changes.

Branding

These settings will apply to all users of the Admin.

Company Name	<input type="text" value="Emallarray"/>
Company Web Link	<input type="text" value="http://www.emallarray.com"/>
Support E-mail	<input type="text" value="support@emallarray.com"/>
Company Color	<div>  <input type="text" value="#243A80"/> <small>HEX</small></div>
Default Logo for Basic Group-Office interface (GIF 210x35) (max 512KB)	<div><input type="text" value="Choose a logo file..."/> <input type="button" value="Browse"/></div> <div><input type="text" value="https://d1v3calcp683kw.cloudfront.net/admins/images/gtech/logo-white.svg"/></div> <div><input type="button" value="Preview"/></div>

Managing Defaults and Resets

If you are testing new branding or want to start over:

- **Reset to Admin Defaults:** Use this button to clear current custom values and return the branding to the system defaults. You can then enter new branding information as needed.
