

OfficeDocs

Office Docs transforms your email account into a complete workspace. It allows you to seamlessly open and edit standard file formats natively inside your webmail.

When you use an Enhanced mailbox, you unlock a full suite of collaboration tools:

- Real-time co-editing: Work on the same document with your team and see changes as they happen.
- Sharing and permissions: Share links securely with internal team members or external clients.
- Version history: Easily track changes and restore previous versions with one click.
- Cross-platform access: Work in your browser or sync files with desktop and mobile apps.

Explore the guides below to set up your workspace and learn how to use these features.
