Zulip Preview

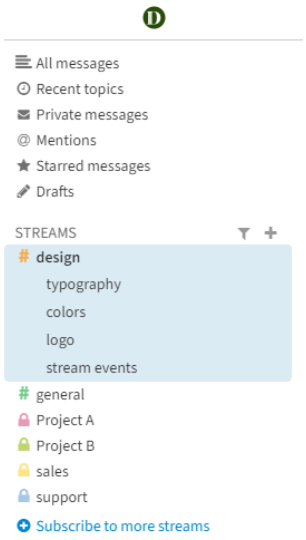

Fully integrated with the Webmail

Log in directly from your Webmail and jump straight into productive conversations.

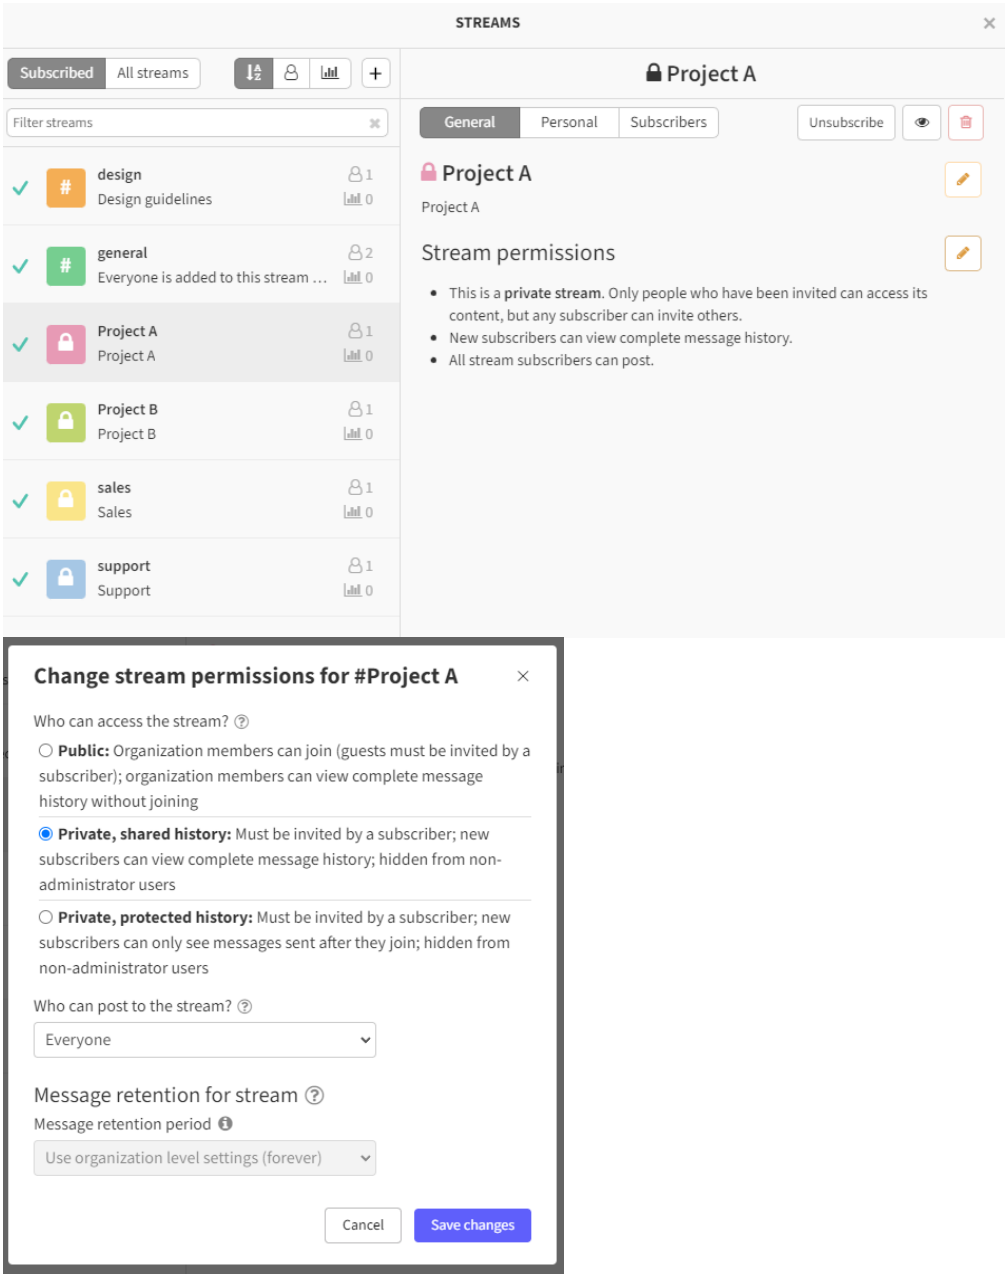

Organize your communications into streams and topics

easier to follow long

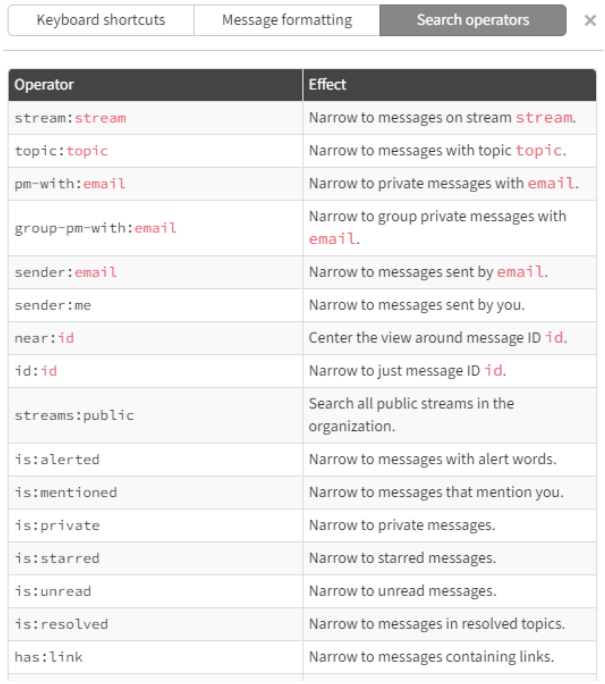

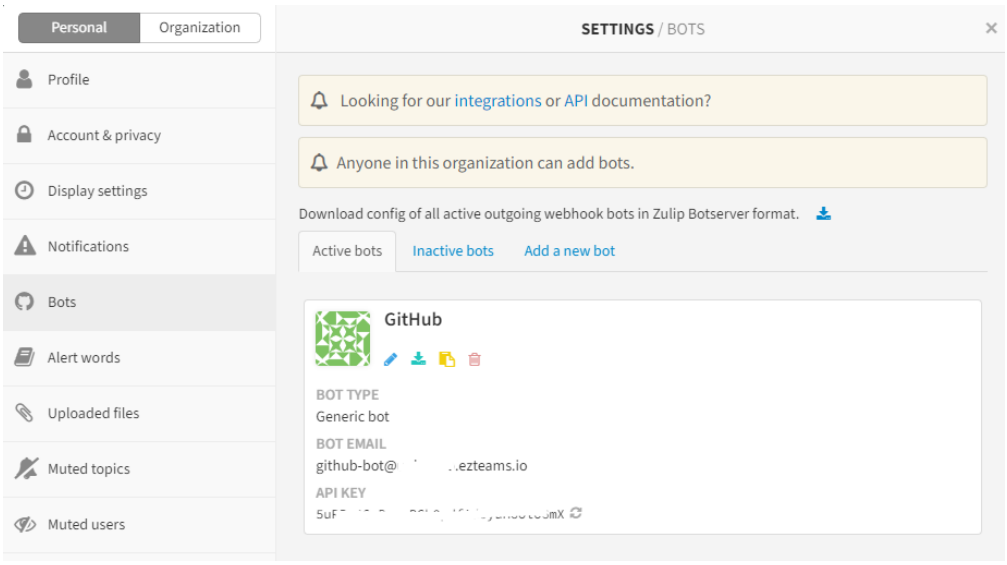

Customize stream permissions

Advanced search options

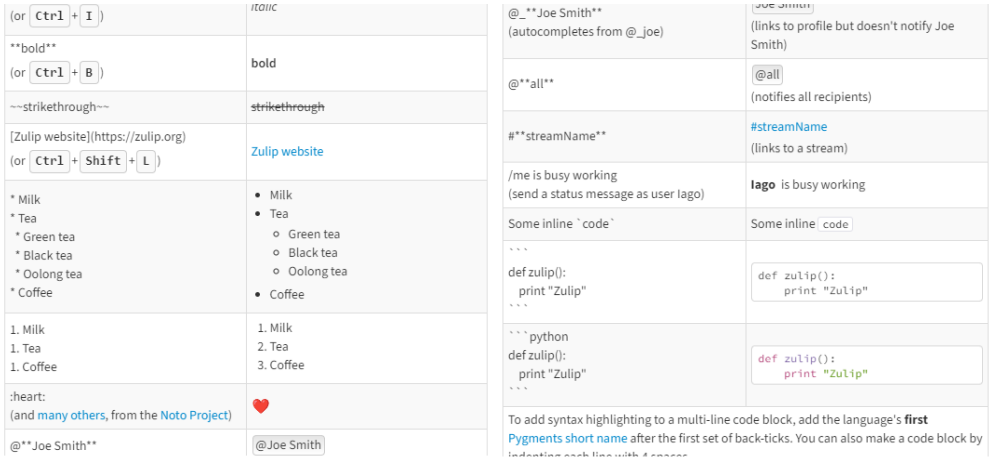

API integration - with Git Hub for example

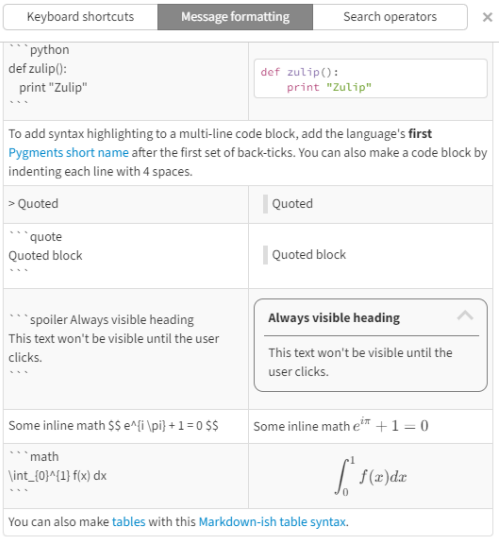

Message formatting

Make your message easier to read with markups such as bulleted lists, bold, italics, and much more.

Discuss code with Markdown code blocks and syntax highlighting or blocks of text with block quotes.

(or Ctrl + I)	*italic*
bold (or Ctrl + B)	**bold**
~~strikethrough~~	~~strikethrough~~
[Zulip website](https://zulip.org) (or Ctrl + Shift + L)	Zulip website
* Milk * Tea * Green tea * Black tea * Oolong tea * Coffee	• Milk • Tea ◦ Green tea ◦ Black tea ◦ Oolong tea • Coffee
1. Milk 1. Tea 1. Coffee	1. Milk 2. Tea 3. Coffee
:heart: (and many others, from the Noto Project)	❤️
@**Joe Smith**	@Joe Smith
@_**Joe Smith** (autocompletes from @_joe)	Joe Smith (links to profile but doesn't notify Joe Smith)
@**all**	@all (notifies all recipients)
#**streamName**	#streamName (links to a stream)
/me is busy working (send a status message as user Iago)	**Iago** is busy working
Some inline `code`	Some inline `code`
`` def zulip(): print "Zulip" ```	`def zulip():` `  print "Zulip"`
``python def zulip(): print "Zulip" ```	`def zulip():` `  print "Zulip"`
To add syntax highlighting to a multi-line code block, add the language's **first** Pygments short name after the first set of back-ticks. You can also make a code block by indenting each line with 4 spaces.	

Keyboard shortcuts | Message formatting | Search operators

``python def zulip(): print "Zulip" ```	`def zulip():` `  print "Zulip"`
To add syntax highlighting to a multi-line code block, add the language's **first** Pygments short name after the first set of back-ticks. You can also make a code block by indenting each line with 4 spaces.	
> Quoted	Quoted
``quote Quoted block ```	Quoted block
``spoiler Always visible heading This text won't be visible until the user clicks. ```	**Always visible heading** This text won't be visible until the user clicks.
Some inline math $$ e^{i \pi} + 1 = 0 $$	Some inline math $e^{i\pi} + 1 = 0$
``math \int_{0}^{1} f(x) dx ```	$\int_0^1 f(x)dx$
You can also make tables with this Markdown-ish table syntax.	

Enterprise-grade security

Zulip is used by some of the most security-conscious organizations in the world.
